Key points The PC version features while also being fairly well optimized. The OS X version suffers from multiple issues, one being the complete lack of multiplayer, due to the GameSpy services being shut down.[3] General information Official changelog GeForce Tweak Guide Steam Community Discussions Availability[edit] Steam and Rockstar Games Social Club online key verification on launch. All versions require Rockstar Games Social Club for activation and online features. All Windows versions use GameShield IronWrap DRM.[5] Rockstar have not disclosed details of how many machine activations are allowed nor any other restrictions.[6] DLC and expansion packs DLCs are now a part of the base game. Essential improvements[edit] Patches[edit] Updates for the retail versions can be found here. Max Payne 3 Fusion Fix[edit] Adds the ability to hide the skip cutscene button as well as to increase the size of subtitle text outlines. Game data[edit] Save game cloud syncing[edit] Save game files syncing with the Rockstar Games cloud. Video[edit] Advanced graphics settings. Letterboxed behavior example (16:10 resolution used). Field of view (FOV)[edit] This game uses vertical FOV. See FOV Calculator for help. Change FOV with Cheat Engine. Run the game and switch back to Cheat Engine. Click on Open Process and select MaxPayne3.exe. Activate the checkbox beside FOV (F3). Double-click on the value of 70 to change if needed. Notes Weapon zoom and cutscenes are affected; toggle script with F3 when needed. Default FOV is different for certain resolutions lower than FHD (e.g. 1152x864) Input[edit] Audio[edit] Localizations Most languages can be forced by using -language Language. For Brazilian Portuguese use -language Portuguese. See Command line arguments. Network[edit] Multiplayer types Connection types VR support[edit] The game must be installed under C:\Program Files (x86)\Steam\Steamapps\Common\Max Payne 3 in order for Social Club to load, which is required to play the game. If the game was installed to a custom Steam folder, there are two methods to solve the issue. Symlinks[12] It is possible to create a symlink to the folder C:\Program Files (x86)\Steam\Steamapps\Common\Max Payne 3 Run the command mklink /D "Max Payne 3" "K:\Games\Steamapps\common\Max Payne 3" "K:\Games\Steam\Steamapps\common\Max Payne 3" "K:\Games\Steam\Steamapps\common\Max Payne 3 Max Payne 3 installation. Next time you run the game through Steam it will reinstall the prerequisites, and then let you play the game. Copy installation[citation needed] The game must be installed under C:\Program Files (x86)\Steam Steamapps\Common\Max Payne 3 in order for Social Club to load, which is required to play the game. If the game was installed to a custom Steam folder, copy (not move) it to C:\Program Files (x86)\Steam\Steamapps\Common\Max Payne 3, then have Steam uninstall the game, then reinstall it to the default location. Steam will detect the existing files and fix the installation, and the game will proceed properly. If the problem is not solved: Ensure the MaxPayne3.exe does NOT have compatibility or Admin rights settings applied. Use the -scdetectproxy steam launch option. Delete the Social Club such as v1.0.9.7. Run the game and it will tell you to update the Social Club program. Run the installer from Max Payne 3's MP3Installers folder. Unable to sign into Rockstar Games Social Club[edit] Delete files[13] Go to the installation folder. Delete maxpayne3_steam.ini, steam_appid.txt Verify integrity of game cache. Game will not launch[edit] The game will not launch[edit] The game will not launch for many users.[14] Change to DirectX 9[15] This can be fixed by going into safe mode, and changing the game to DirectX 9. Install game. Update GPU drivers. Restart PC. Use the -safemode -windowed command line arguments. Restart PC. Use the -safemode -windowed command line arguments. Restart PC. Use the -safemode -windowed command line arguments. mouse sensitivity[edit] Even after the patch which introduced a mouse acceleration toggle, some players experience negative mouse acceleration. Reduce graphics settings[citation needed] Turning off FXAA, MSAA, and vsync may help to make negative mouse acceleration tolerable. Copy ddraw.dll to Max Payne 3 folder Copy ddraw.dll from Windows\System32 folder, or SysWow64 folder (different file size), or just download Custom ddraw.dll changes mouse feeling too. Or maybe not in every case for better. It can be easily tested even in main menu. Not sure if custom libraries don't cause rare falling under map glitch on the airport level, or not loading part 2 of the office level (though SweetFX or dsound.dll can be also culprits). Rinput dosen't work in this game. Game goes to pause menu randomly[edit] This error is usually caused by having an Xbox 360 Wireless Network Adapter plugged into USB. Remove Xbox 360 Wireless Network Adapter[citation needed] Error code 1641 on launch[edit] Restart[citation needed] This error is related to .NET 3.5. Restarting. Game crashes with StackHash_XXX Error[edit] Administrator privileges[citation needed] Run maxpayne3.exe as an administrator. Fix Data Execution Prevention setting[citation needed] Ensure Data Execution Prevention (DEP) is set to the default (Windows programs and services only). ERR OS VISTA[citation needed] Ensure Data Execution Prevention (DEP) is set to the default (Windows programs and services only). Follow these steps to stop Windows Vista/7 from forcing Steam into compatibility mode:[16] Go to HKEY CURRENT USER\Software\Microsoft\Windows NT\CurrentVersion\AppCompatFlags\Layers Look for an entry with your path to steam.exe Delete that entry If you don't find it there try HKEY LOCAL MACHINE\Software\Microsoft\Windows NT\CurrentVersion\AppCompatFlags\Layers Look for an entry with your path to steam.exe Delete that entry If you don't find it there try HKEY LOCAL MACHINE\Software\Microsoft\Windows NT\CurrentVersion\AppCompatFlags\Layers Look for an entry with your path to steam.exe Delete that entry If you don't find it there try HKEY LOCAL MACHINE\Software\Microsoft\Windows NT\CurrentVersion\AppCompatFlags\Layers Look for an entry with your path to steam.exe Delete that entry If you don't find it there try HKEY LOCAL MACHINE\Software\Microsoft\Windows NT\CurrentVersion\AppCompatFlags\Layers Look for an entry with your path to steam.exe Delete that entry If you don't find it there try HKEY LOCAL MACHINE\Software\Microsoft\Windows NT\CurrentVersion\AppCompatFlags\Layers Look for an entry with your path to steam.exe Delete that entry If you don't find it there try HKEY LOCAL MACHINE\Software\Microsoft\Windows NT\CurrentVersion\AppCompatFlags\Layers Look for an entry with your path to steam.exe Delete that entry If you don't find it there try HKEY LOCAL MACHINE\Software\Microsoft\Windows NT\CurrentVersion\AppCompatFlags\Layers Look for an entry with your path to steam.exe Delete that entry If you don't find it there try HKEY LOCAL MACHINE\Software\Microsoft\Windows NT\CurrentVersion\AppCompatFlags\Layers Look for an entry with your path to steam.exe Delete that entry If you don't find it there try HKEY LOCAL MACHINE\Software\Microsoft\Windows NT\CurrentVersion\AppCompatFlags\Layers NT\CurrentVersion\AppCompatFlags\Layers Graphics settings not saving[edit] Game may report that video memory is 0/0. This may be caused by older graphics.xml[17] One fix is to edit %USERPROFILE%\Documents\Rockstar Games\Max Payne 3\graphics.xml Steam version product key activation error[edit] Move installation folder[citation needed] For the error message "no activations remaining for this activation key" or "cannot contact activation key" or "cannot contact activation server [18] when trying to activate the game over socialclub. The issue can be remedied by moving your max payne 3 installation from \steamapps\common to \steamapps\ Right click on maxpayne3.exe Run it as an administrator.[19] Once this is done, the game will activate properly. Requires Service Pack 1 [citation needed] This can be fixed by finding the maxpayne3.exe file. Right clicking and setting the compatibility mode to "Windows XP (Service Pack 3)".[20] Running maxpayne3.exe as an administrator may also fix the problem. Asus software[citation needed] Game freeze during startup[edit] Can be fixed by reinstalling Rockstar Games Social Club before launching. This have to be done every time before launching the game. Also make sure that your internet connection works fine. Problem may also appear during using Android smartphone as modem. When using Steam version, the problem may also appear during using Android smartphone as modem. glitches[edit] This mode can reveal few glitches which you can encounter during gameplay, resulting being unable to finish the game: List: You don't have to fight with Passos with enemies searching the balcony (wait till they gone). It's a place with painkillers ahead. [Stadium, PT I CH III] Fabiana dead during shooting from boat during final cutscene (shoot on the enemies from the left side, you can accidently kill her on low brightness) IT man will be shot if you go down the stairs (you must kill all enemies first - bullet cam must appear). Infinite loading of Branco's office PT 2 (disapears after few NYMHC attempts, try to not skip prior cutscenes to help against this) Enemies stop to respawn, doors are closed, in Favela PT 1 (if you flip all the time through the section leading to enemy with flare, and if you run too fast when you spot him from distance - stay where you are when you'll see him until he disapear and when he shoot the flare). Rare case when you can't pick up shotgun in a chapel in the very end of the level [PT 2 CH VIII] You can't shoot enemies in the helicopter during cutscene of Favela PT 2 (1. If you have no ammo left for M972 2. If you picked up M972 after enemy) You can't destroy aforementioned helicopter (if you later shoot only once in the rocket - even when bullet cam appeared, you will fail anyway when rocket won't explode) Caps lock, num lock, scroll lock are not registered as pressed, during melee fight in the end of Favela PT II level (don't use them as any of primary keys - only as secondary) Game is glitched when you get hit while shooting Desert Eagle on a rope (probably while shooting very fast and inaccurate while having infinite clip in this interactive cutscene) [Boat, PT III, CH XI] You're dead after the end of the armoured-truck-defence cutscene is shown - key pressing W while the cutscene is shown - key pressing is still registered during the cutscene is shown - key pressing W while the cutscene is shown - key pressing is still registered during the cutscene is shown - key pressing will not die) if you get hit by the enemy running out after beep signal, after the sequence of shooting at distant enemies on the rooftop (if you were shooting train jump cutscene in the end level (if you didn't replace this weapon in second slot from the beginning; immediately after bullet time cutsence you have still no ammo like before cutscene) [PT III, CH XIV] Rare falling under map glitch in airport level (not sure if any of custom libraries cause it, e.g. SweetFX, ddraw, dsound or slow HDD) Random crashes during the game (use Steam in offline mode - game's more stable, set your CPU/GPU clocks to stock values, restart computer before playing) Notes If you use no cutscenes script, carefully read notes here. Hoboken Alleys map in Dead Men Walking mode crashing the game[21][edit] Requires Deathmatch Made In Heaven Pack DLC Replace files in installation folder: Back up DLC6Pack.rpf and DLC6CompatPack.rpf located in \Max Payne 3\. Download modified files. Copy the downloaded files to \Max Payne 3\ and replace the original files. Start the game, select Multiplayer, Private Match, in match settings set Mode to Co-operative, set Location to Tietê River Docks and choose a difficulty. Then hit 4 Enter and select Launch game. The game will start in Hoboken Alleys map. If you want to play Dead Men Walking (co-op/single player) in Tietê River Docks map again, copy the original files back. Mods[edit] Script hook and trainer/mod menu To activate, press 8 to scroll up, 2 down, 0 to back out, 5 to accept, 6 scroll sideways. KTMXHancer Texture Mod, source with Reshade Skip in-game cutscenes[edit] If you skip the cutscenes before specific parts (detailed below), the game won't finish loading properly, forcing you to die or reload the checkpoint, ending a NYMHC run. Install skip cutscenes script[22] Notes In chapter one, after saving Fabiana, Max will be stuck in the elevator and unable to move. In chapter seven, after saving Fabiana, Max will be stuck in the elevator and unable to gameplay, you are instantly killed. In chapter eight, right at the end, in the area where Max and Passos emerge from the morgue and have to deal with the red carpets and curtains), the area fails to load here if you skip the second scene with the explosion, game is crashing after moving forward. In chapter thirteen, when you skip the scene with Da Silva talking to Max, the game will be stuck in a black screen.
